SUMMARY

Software Developer with 3+ years of experience building scalable, high-performance web applications for enterprise clients. Expert in modern JavaScript frameworks, full-stack development, and headless CMS integration. Proven track record of optimizing performance, implementing secure authentication systems, and delivering SEO-optimized solutions that enhance user experience and drive business results.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap.

Backend: Nest.js, RESTful APIs, GraphQL, Cron Jobs (node-cron)

Databases: PostgreSQL, MySQL, MongoDB

Data Access / Mapping: ORM (TypeORM, PrismaORM), ODM (Mongoose)

CMS & Tools: Adobe Experience Manager (AEM Forms & Sites), Strapi (Headless CMS), Git, GitHub, Jira

Core Competencies: Performance Optimization, Security (RBAC and OTP), Agile/Scrum

PROFESSIONAL EXPERIENCE

Associate Technology L1 - Frontend Web Developer

April 2023 – Present

Ayasya Digital Solutions, New Delhi, India

- Architected and deployed enterprise-grade web applications using Next.js, TypeScript, and React.js for major clients including Aditya Birla Capital and Haldiram, serving thousands of active users with 99.9% uptime
- Engineered secure authentication systems with OTP-based verification, role-based access control (RBAC), and protected routing, integrating RESTful APIs and GraphQL for efficient data management across user roles
- Developed automated cron job systems using node-cron for scheduled email notifications, user query routing, newsletter management, and login history tracking, with configurations managed via Strapi CMS
- Implemented comprehensive SEO strategies including meta tags, Open Graph tags, Twitter cards, canonical URLs, and schema markup, achieving top search rankings and improving organic traffic.
- Built dynamic content management systems using Strapi CMS and GraphQL, enabling non-technical stakeholders to independently manage content, configurations, and backend operations without code deployments.
- Optimized application performance through code splitting, lazy loading, and Next.js SSR/SSG, achieving 95+ Lighthouse scores and reducing page load times by 45%
- Managed UAT and production deployments with zero-downtime releases.
- Developed advanced search functionality with debounced input handling, localStorage integration for search history, and category-scoped filtering across products and blog content.
- Designed and built interactive data visualizations using D3.js, creating responsive world and India maps with data-driven rendering for business analytics dashboards
- Collaborated in Agile/Scrum teams using Jira for sprint planning, conducted code reviews, and mentored junior developers on best practices and modern development patterns

KEY PROJECTS

Aditya Birla Capital – Impact Portal | *Next.js, TypeScript, Strapi, GraphQL, Redux, Strapi*

- Built full-featured web platform with separate modules for ABC and Non-ABC users, implementing RBAC, protected routing, and role-specific features ensuring secure data visibility
- Designed secure authentication flow with login, signup, and OTP verification, managing global state with Redux and integrating client REST APIs and GraphQL endpoints
- Automated backend operations with scheduled cron jobs for email routing, newsletter subscriptions, and login tracking, all configurable through Strapi CMS by non-developers
- Delivered mobile-first, responsive UI using modular architecture.

ABC of Money – SEO-Optimized Blog Platform | *Next.js, TypeScript, Strapi, GraphQL, Redux*

- Developed SEO-optimized content platform with comprehensive metadata including Browser Title, Meta Tags, Open Graph, Twitter Cards, and Canonical Tags for maximum search visibility
- Implemented dynamic blog taxonomy allowing multi-category mapping, context-aware breadcrumbs adapting to navigation flow, and content discovery features (trending, popular, related articles)
- Built debounced search across homepage, categories, and subcategories with pagination and optimized data fetching strategies

Haldiram – E-Commerce Platform | *Next.js, Strapi, GraphQL, D3.js*

- Implemented global and category-based search with debounced handling, localStorage search history, and Next.js SSR for improved performance and SEO
- Created three lead-generation forms with Strapi storage, automated email notifications via cron jobs, and centralized configuration management
- Built interactive geographic visualizations using D3.js for business analytics and regional distribution mapping

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

August 2019 – July 2023

Guru Tegh Bahadur Institute of Technology, Delhi, India

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, Software Engineering
